

# The Secure Paperless System that protects your wireless profits

## Save Money. Improve Accuracy.

CaptureOnce is a revolutionary data management tool for wireless agents and carriers. A simple add-on to your existing point-of-sale system, CaptureOnce allows you to electronically capture information required for wireless phone activations, such as driver's license, customer signatures, carrier contracts and more. With CaptureOnce, your sales team simply scans the customer's driver's license. Our unique Data Bar allows the user to drag and drop the customer's information into other websites and point-of-sale systems. When the activation is complete, CaptureOnce securely uploads all the information your business needs for commissions reconciliation and dispute resolution.

## Fast • Secure • Online

- Reduce transaction time
- Eliminate data entry errors
- End missing or incomplete paperwork
- Reduce fraud and identity theft

## Captures Everything You Need For Valid Activation
